

To see short demo videos of weddings, special events and football and a "DVD Animated Picture Movie Show" made for Windows Media Player (optimised for the web) Go to my website www.creationsvideography.com

The Footy- Video Production Description **Each DVD copy Includes –**

1. Video footage from the game from one video cameraman's filming point of view on one professional video camera (we normally set the video camera on a tripod near the centre line position of the field opposite the scoreboard, so we can film the scores when a goal is kicked and at end of each quarter. If we can get an elevated and all angled clear view position of the field we will place our camera there). Also we can include live commentary audio from 2 volunteers from the clubs on the day in two microphones connected hard wired to the camera (this is only possible if people would like to volunteer – client to organise).
2. Two DVD's - One DVD will have the 1st half of the game and the other DVD will have the 2nd half of the game (or often depending on length of each quarter we can fit the game to one DVD disc).
3. A double DVD library case for the two DVD's or single DVD library case for the one DVD.
4. Colour images taken from the video printed on the DVD library case sleeve (or client to supply photo images) with your choice of title (client to supply information) and the final scores on the back.
5. Colour images taken from the video printed on each DVD disc with a title (or client to supply photo images).
6. Each DVD will have an animated (video background), interactive, DVD title menu with music for scene selection of each quarter.
7. Your copy will be posted to you in a few days. Please leave your name and details on the order form and pay your money and then we will give you a receipt.
