## **WEDDING VIDEO PRODUCTION PACKAGES PRICE LIST**

(\* = Price includes shooting fee only)

**Note: Prices below effective from 7/1/2009. Quotation valid for 30 days from quote date or issue date**

**Prices start from as low as \$450\* plus the 'Budget Non-edited Video Package' (as below)**

*This initial price includes 2 hours of video coverage on the day, it starts from the ceremony, and it can usually cover the entire ceremony, the group family photo session, and (if there is extra time left in the 2 hours) some of the bridal party photo session in the gardens.*

**Extra hours required on the day from the videographer by the client are charged at \$100/hour\* (i.e. \$25.00\* per 15 minutes and part there of).**

*You choose the extra hours required from us to suit your day from starting time to finishing time on the day inclusive. This can be starting from the groom's home, then the bride's home, the ceremony, the group family photos, the bridal party garden shots, and then the last shot can be a mock cake cut at the reception. Alternatively, a good finish is just after the bridal waltz or we can record the entire day for you, and include the entire reception events including interviews with your guests, party dancing, garter and bouquet throw, and the farewell to the bride and groom (see over for details of a full day video coverage).*

*Please note; a full day video coverage usually can be around 10 to 12 hours of cameraman attendance on the day.*

**The above prices are for video productions that are not edited. Please add edit fees as below for edit packages.**

**The 'Budget Non-edited Video Package' (prices as above)**

**The client receives the non-edited production mastered on to 3 x DVD's.**

*This package is a no frills, non-edited video of all the footage shot on the day. We copy the video stock footage directly from the camera original master digital tapes and it can be quite lengthy. There are no additional childhood photographs, opening titles or credits, computer special effects, or background music or DVD menus. The only editing that is done is that it is captured on to the computer in the edit program and all the footage is joined together for recording to DVD. The sound track is carefully enhanced and levelled if needed to make the sound more audible, and then we convert (encode) the file on the computer to an mpeg-2 file for DVD production then burn the DVD's.*

*All copies include a personalised printed wedding video cover with a digitally printed montage of images from the video with text. The DVD surface also has a montage of images from the video printed on the disc with text.*

### **Editing Fees -**

**The 'Highlight Montage Edit Package' (prices as above and add edit fee of \$650)**

**The client receives the edited production mastered on to 5 x DVD's.**

**The client receives all the non-edited video mastered on to 3 x DVD's.**

*This edit package is an edited fast-paced music video including the highlights of the whole day (this is similar to the "Longer Highlight Edit Package" below except that we trim down the ceremony (but not the vows) and the speeches to the main points).*

*The edited video can be usually 20 to 40 minutes in length (the edited video length depends on length of day of shoot; therefore how much stock footage is available to edit) and is digitally edited to the music of your choice, which includes the addition of childhood and/or courting day photographs, opening titles, computer special effects (cross dissolves, fade to black, slow motion, fast motion, and black and white, stills, etc), and final credits, this is a very entertaining video for all to watch. This is perfect for showing all your relatives and friends who may not want to sit through a long video with a long ceremony and speeches. All edited DVD's include fully animated interactive DVD menus for scene selection.*

*All copies include a personalised printed wedding video cover with a digitally printed montage of images from the video with text. The DVD surface also has a montage of images from the video printed on the disc with text.*

**The 'Longer Highlight Edit Package' (prices as above and add edit fee of \$650)**

**The client receives the edited production mastered on to 5 x DVD's.**

**The client receives all the non-edited video mastered on to 3 x DVD's.**

*This package is a similar style and content of edit to the 'Highlight montage' (a fast-paced music video including the highlights of the whole day). Except that (with a short day of filming, when the ceremony was only recorded on the day) when the ceremony is edited from the stock footage on the day, the ceremony would be kept as a longer version (close to what the actual day was). With a full day of recording on the day (when the ceremony and the speeches at the reception were all recorded on the day) the ceremony, and the speeches, toasts and telegrams are edited from the stock footage, these items are kept as a longer version (close to what the actual day was). The edited video is approximately 60 to 90 minutes in length. The edited video length would depend on the length of day of the shoot and depending on how long the ceremony, the speeches, toasts and telegrams are. The video is digitally edited to the music of your choice, which includes the addition of childhood photographs, opening titles, computer special effects (cross dissolves, fade to black, slow motion, fast motion, and black and white, stills, etc), and final credits. This type of video is perfect for those who have short ceremonies and speeches of about 20 to 30 minutes each. All edited DVD's include fully animated interactive DVD menus for scene selection. All copies include a personalised printed wedding video cover with a digitally printed montage of images from the video with text. The DVD surface also has a montage of images from the video printed on the disc with text.*

## **A full day video coverage of a wedding (example only)**

### **Job description of the special day (in order of the day) -**

- Segments of shots of the groom and the groomsmen at his parent's home or wherever else they decide to prepare for the wedding. (1 hour required here to shoot video). Example of schedule shooting time - Start at 12pm and finishes at 1pm.
